Human-Computer Interaction, Training Systems
Adjunct Faculty Candidate and Research Associate
The MOVES Institute, Naval Postgraduate School
Monterey, California

It's hard to beat the location and atmosphere of the U.S. Naval Postgraduate School. The location is Monterey, California, a scenic, uncongested Pacific coast city one hour's drive south of San Jose. The atmosphere is an all-graduate M.S. and Ph.D. program with top-notch students and rich research opportunities. The MOVES Institute is looking for adjunct faculty members especially in the areas of human-computer interaction, human factors, and training systems. Candidates should possess an advanced degree in a related area of interest and must be U.S. citizens, permanent residents, or in the process of becoming a permanent resident. Faculty teach graduate classes, supervise theses, and conduct research. The MOVES Institute maintains a very active Laboratory for Simulation and Training where we work in the use of Virtual Environments and Gaming Technologies for training. The School has a strong commitment to teaching and research excellence. Positions are immediately available to qualified candidates.

Send electronically your curriculum vitae and a cover letter outlining your research and teaching interests and accomplishments to darken@nps.navy.mil. The U.S. Naval Postgraduate School is an Equal Opportunity Employer.
